Gerry Bomotti
Vice Chancellor for Planning, Budget and Administration

Re: Delegation of Authority – Cyber-Risk Responsible Executive

The University of California President directed each Chancellor to appoint a single executive who will coordinate and be responsible for efforts to strengthen cybersecurity at their location. For purposes of these responsibilities, the executive must directly report to the Chancellor. The executive is called the Cyber-Risk Responsible Executive (CRE).

Effective as of this date, I appoint Gerry Bomotti, Vice Chancellor for Planning, Budget and Administration, as the CRE. The CRE is accountable for all information risk assessments, security strategies, planning and budgeting, incident management, and information security implementation. In addition, the CRE serves on UC's Cyber-risk Governance Committee (CRGC).

This appointment remains in effect until rescinded in writing. This authority may not be re-assigned.

Sincerely,

A handwritten signature in black ink, appearing to read "Kim A. Wilcox".

Kim A. Wilcox
Chancellor
